

SPEAKER BIO:

Stuart Bowman *C.Eng, MEI, CIBSE LCC, FRSA*

Stuart Bowman is the Director of the Energy and Sustainability Division at multi-disciplinary consulting engineers, hurleypalmerflatt. Stuart is a passionate believer in “evolution not revolution” when helping clients to achieve changes in their energy policies. He is process-driven, believing that effective change requires working with the flow in organisations, and not against it.

Stuart is also a Low Carbon Consultant and a Carbon Trust Adviser. He has vast experience in delivering sustainable solutions for construction as well as strategic environments, and his work spans most sectors of industry from commercial to education to healthcare.

Stuart is currently heading up phase three in the energy and sustainability solution for Stockley Park, which is the first data centre to meet GLA energy requirements. This project includes a 5MW on site Combined Heat Power and Cooling Energy Centre together with a 500kW Geothermal Heating and Cooling scheme. He is also currently fronting an on-site renewable and energy study for a corporate telecommunications company, which is likely to include a 40MW energy centre.
