

SPEAKER BIO:

Mark Tamburro

Mark Tamburro is Vice President of Workplace Resources at Nokia, the world leader in mobile communications. At Nokia, Mark is responsible for over 22M sq. ft. of Office, R&D, Retail, and Production real estate and provides support services to 65,000 employees in 400 locations covering 130 countries. In his role, Mark and his team have particularly focused on building a flexible portfolio strategy, developed and implementing Nokia's mobile working program, implemented regional and global service provider partnerships and, last but not least, introduced integrated technology, processes, and tools into many parts of the real estate and workplace support activities. Mark recognises that real estate will remain as a key component of the Workplace Resources activity at Nokia, however, he and his team have also focused their attention on developing solutions to better 'enable work' and delivering the ultimate in productivity – allowing today's knowledge worker to 'work anytime, at anyplace, with any device'. This is aligned to the Nokia vision of 'LIFE & WORK GOES MOBILE'

Mark has over 20 years experience in Corporate Real Estate and Facilities and prior to joining Nokia in 2000, Mark was EMEA Real Estate Director at Dell where he was responsible for all real estate activities including the development of offices, production facilities, and numerous call centres throughout Europe, Middle East & Africa.

Prior to Dell, Mark spent six years at Microsoft as Head of Real Estate where he was responsible for various European and Middle East office projects including the development of the Microsoft UK Campus at Thames Valley Park, Reading.

Mark has a HNC & HND in Mechanical/Electrical engineering and is a board member of CoreNet Global.
