

Rashmi Gopal

Rashmi Gopal is an Associate Fellow at The Energy and Resources Institute (TERI). She is part of the Energy Environment Policy Division and works on environmental issues including renewables, solid waste, air quality and water resource management. She interacts with businesses on consultancy projects and facilitates Corporate Social Responsibility initiatives. Her passion lies in working with students and young adults in creating awareness on the environment and other aspects of sustainable development.

She is a member of the technical committee constituted by the Government of Karnataka (India), for developing the rainwater harvesting policy for the State and has authored a training manual on rainwater harvesting for practitioners in urban areas. She is also a member of the committee on climate change and sustainability, constituted by the Chairman of the Legislative Council of Karnataka.
